Foreword	vii
Fatigue behavior of a cross-ply titanium matrix composite under tension-tension and tension-compression cycling Elizabeth A. Boyum and S. Mall (Providence, RI, USA)	1
Numerical analysis of fibre bridging and fatigue crack growth in metal matrix composite materials.	12
M.R. Begley and R.M. McMeeking (California, USA)	
A conceptual framework for interpretation of MMC fatigue	21
Ramesh Talreja (Atlanta, USA)	
An approach to fatigue life modeling in titanium-matrix composites.	29
Theodore Nicholas (OH, USA)	
Fatigue damage in a unidirectional SiC/Al composite due to push-pull and zero-pull loading	38
Y. Peng and T.K. Chaki (New York, USA)	
Effects of control mode and <i>R</i> -ratio on the fatigue behaviour of a metal matrix composite	47
B. Lerch and G. Halford (Cleveland, USA)	
Failure mechanisms during isothermal fatigue of SiC/Ti-24Al-11Nb composites	55
P.K. Brindley and P.A. Bartolotta (Cleveland, Japan)	
Fiber volume fraction effects on fatigue crack growth in SiC/Ti-15-3 composite	68
S.J. Covey, B.A. Lerch and N. Jayaraman (Cincinnati, USA)	
Fractographic interpretation of failure mechanisms in titanium matrix composites	78
W.S. Johnson, (Atlanta, USA), J.L. Miller and M. Mirdamadi (Hampton, USA)	
An investigation of the effects of microstructure on fatigue damage in a symmetric [0/90] _{2s} silicon carbide (SCS6) fiber-reinforced titanium matrix composite.	89
W.O. Soboyejo and B.M. Rabeeh (Columbus, USA)	
On the development of fatigue failure maps for titanium matrix composites	103
F.W. Zok, Z.-Z. Du and S.J. Connell (California, USA)	
Constituent damage mechanisms in metal matrix composites under fatigue loading, and their effects on fatigue life . . .	114
Bhaskar S. Majumdar and Golam M. Newaz (OH, USA)	
Isothermal fatigue behavior of a titanium matrix composite under a hybrid strain-controlled loading condition.	130
Brian Sanders and Shankar Mall (OH, USA)	
Interfaces and fatigue damage in a metastable beta titanium matrix composite.	140
W.O. Soboyejo, B.M. Rabeeh and P. Kantzos (OH, USA)	
Thermo-mechanical fatigue modeling of advanced metal matrix composites in the presence of microstructural details . .	156
Todd O. Williams and Marek-Jerzy Pindera (VA, USA)	
Characterization and modeling of stiffness reduction in SCS-6-Ti composites under low cycle fatigue loading.	173
P.C. Wang, S.M. Jeng and J.-M. Yang (CA, USA)	
Thermal fatigue behavior of squeeze cast, discontinuous alumina-silicate fiber-reinforced aluminium alloy (A356) composite.	181
Alan E. Herr, Sridhar Canumalla and Robert N. Pangborn (PA, USA)	
The effect of fatigue microcracks on rapid catastrophic failure in Al-SiC composites	192
E.Y. Chen, L. Lawson and M. Meshii (IL, USA)
